

ABHAY SINGH

Site Reliability Engineer | DevOps Engineer | AWS Cloud Engineer

Sukhdev Vihar, New Delhi | 7880814200 | abhayrajpoot4200@gmail.com | [Portfolio](#) | [Introduction](#)

PROFESSIONAL SUMMARY

Results-driven Site Reliability Engineer / DevOps Engineer with 3.5+ years of hands-on experience designing, automating, and operating highly scalable, secure, and cost-optimized cloud infrastructure on AWS. Sole architect and implementer of a production-grade AWS ECS environment built entirely from scratch, and creator of multiple end-to-end automation systems spanning cost optimization, idle-resource cleanup, security/access-key rotation, alerting, and container image lifecycle management — collectively reducing monthly cloud spend by up to 40%. Strong foundation in CI/CD pipelines, container orchestration, infrastructure automation, database administration, cloud security, and observability, with a track record of independently standing up infrastructure and resolving complex production issues.

WORK EXPERIENCE

Aakash Educational Services Limited — New Delhi, India

Feb 2023 – Present

Site Reliability Engineer-I / DevOps Engineer

- **Sole architect of production-grade AWS ECS (EC2 launch type) infrastructure** built entirely from scratch — owning architecture, deployment, and day-to-day operations for business-critical applications.
- **Cut monthly AWS costs by up to 30%** by designing Lambda-based automation for resource scheduling, Spot/On-Demand blending, idle-resource cleanup, and right-sizing recommendations.
- **Built automated start/stop scheduling for EC2 and RDS** instances during nights and weekends, eliminating compute waste during off-hours and reducing cost by an additional ~30%.
- **Developed a monthly idle-resource detection and cleanup automation** to continuously identify and remove unused AWS resources before they accrue cost.
- **Implemented automated IAM access-key rotation and security compliance checks** using AWS Config and Lambda, strengthening the organization's security posture and audit readiness.
- **Built an automated mailer/notification system** to deliver operational alerts, cost reports, and compliance summaries to stakeholders.
- **Configured automated ECR lifecycle policies** to manage container image retention and reduce registry storage costs.
- **Designed and maintained CI/CD pipelines using Jenkins**, enabling zero-downtime deployments for containerized microservices.
- **Set up centralized log forwarding from production servers to OpenSearch**, enabling searchable, centralized logging for faster troubleshooting and analysis.
- **Integrated New Relic APM across servers** to capture application performance metrics, traces, and error data for end-to-end observability.
- **Implemented CloudWatch dashboards, alarms, and log-based alerting** for proactive incident detection and SLA compliance.
- **Administered Aurora MySQL and SQL Server RDS clusters**, including backups, performance tuning, and failover configuration.
- **Managed the full Docker container lifecycle** — image builds, ECR registry, task definitions, service deployments, and troubleshooting.
- **Independently stood up multiple infrastructure environments from scratch** to support new applications and evolving business requirements.
- **Diagnosed and resolved numerous production issues** across infrastructure, deployments, and application performance, improving overall system reliability.
- **Managed IAM roles and policies** following least-privilege and AWS security best practices.

- Collaborated closely with development teams to improve system reliability, performance, and release velocity.

TECHNICAL SKILLS

- **AWS Cloud:** ECS (EC2 launch type), EC2, S3, VPC, Lambda, CloudFront, IAM, RDS (Aurora MySQL, SQL Server), CloudWatch, ECR, AWS Config
- **DevOps & CI/CD:** Jenkins, Docker, CI/CD Pipeline Design, Container Orchestration, Release Management, Zero-Downtime Deployments
- **Automation & Scripting:** Python (Lambda functions, automation scripts), Bash, Infrastructure Automation, Scheduled Jobs
- **Security & Compliance:** IAM Policies, Least-Privilege Access, Access Key Rotation, AWS Config Compliance Automation
- **Monitoring & Observability:** CloudWatch Dashboards, Alarms, Log-Based Alerting, OpenSearch (Log Forwarding & Analysis), New Relic APM, Incident Detection, SLA Monitoring
- **Databases:** Aurora MySQL, SQL Server (RDS) — Backups, Performance Tuning, Failover
- **Tools & Practices:** Git, Jira, Confluence, Cost Optimization, High Availability, SRE Principles, Agile/Scrum

EDUCATION

Master of Computer Applications (MCA)

Jamia Millia Islamia University, New Delhi

2021 – 2023

10th & 12th

Jawahar Navodaya Vidyalaya, Farrukhabad, UP

2017

Certifications/Achievements & Learning

- Two times Employee of the Quarter AWARD
- AWS Certified Solutions Architect – Professional (Advanced Architecting on AWS) — [View Certificate](#) ↗
- Amazon Elastic Container Service (AWS ECS) — KodeKloud — [View Certificate](#) ↗
- Advanced DevOps — TrainWithShubham — [View Certificate](#) ↗
- Python for Scripting & Lambda Automation — HackerRank — [View Certificate](#) ↗
- SQL (for Aurora MySQL RDS) — HackerRank — [View Certificate](#) ↗
- Continuous hands-on experience building and operating production AWS environments (2023–Present)
